

The Defense of Jisr Al Doreaa
Practical Exercise 2 “Create a TCP”
(Instructor Notes)

Practical Exercise Guidance

In his second dream 2LT Connors establishes a traffic control point (TCP) but he fails to develop or enforce proper escalation of force/rules of engagement procedures. This results in civilian casualties and a negative media event.

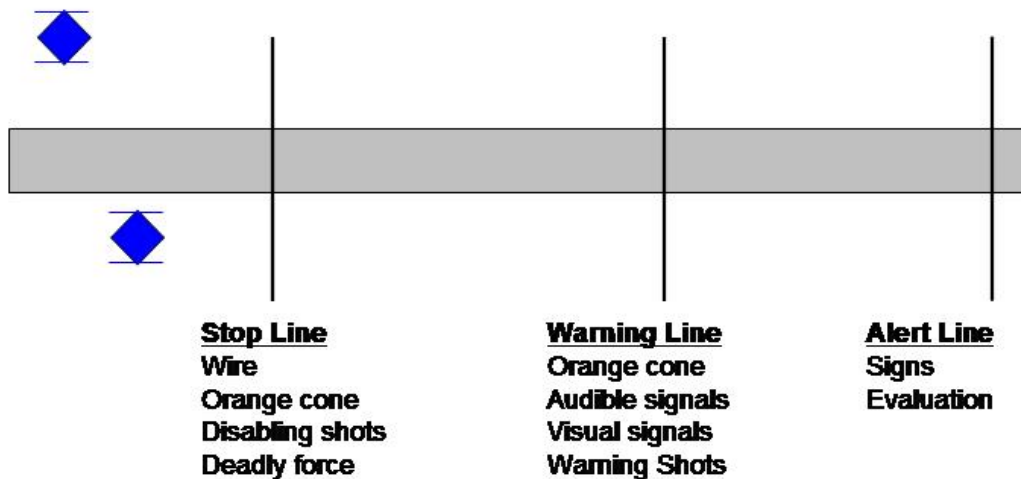

Task: Create a TCP diagram

Conditions: Given two vehicles one section of personnel, warning signs, orange cones, flashing lights, eye safe lasers, speed bumps and spike strips.

Standards: Create a diagram of your TCP and brief your EOF steps based on a civilian vehicle and a VBIED.

Talking Points

Traffic Control Point Diagram

1. Critique the student on the MNCI TCP standard and theater ROE. Standards are FOUO and are available in most division SOPs.
2. Have the student go through the civilian vehicle process from the civilian driver's point of view.
3. If possible establish a full size TCP using available materials.
